EXPERIENCE

Software Engineer May '24 — Present
VOLKSWAGEN GROUP TECHNOLOGY SOLUTIONS INDIA Bangalore, India
Document management system Product

- PPT is a key component of the procurement application, comprising multiple modules such as Document Service, AAS, Data Export Service, and Mailgate Service. These modules are critical to the system's overall functionality. I have primarily contributed to the Document Service and AAS modules, where I implemented new features, resolved bugs, and optimized performance. This hands-on experience enhanced my expertise in backend service development within the procurement domain.
- Designed, developed, and maintained RESTful APIs using Core Java, Spring Boot, Hibernate/JPA, and Spring Security, ensuring scalability, security, and high performance.
- **Implemented JWT-based authentication to ensure secure and stateless user access across APIs.**
- Performed API testing and debugging using Postman to ensure functionality, reliability, and performance of RESTful services.
- Collaborated in Agile development teams, participating in sprint planning, daily stand-ups, and iterative delivery of software features.
- Managed and optimized relational databases using MySQL and SQL for efficient data storage, retrieval, and performance tuning.
- Worked with JSON data formats, RESTful architecture, and created API documentation using Swagger for clear and consistent communication.
- Handled exception scenarios and implemented robust error-handling mechanisms to ensure application stability and reliability.
- Created and utilized Payloads/DTOs (Data Transfer Objects) for efficient and secure data exchange between application layers.
- Managed project dependencies and build lifecycle using Maven to ensure consistent and efficient software builds
- Collaborated with cross-functional teams including developers, testers, and product managers to deliver high-quality software solutions.

Java Developer Dec '23 — May '24
ZKTECO BIOMETRIC INDIA PVT LTD Bangalore, India
Experienced Java Developer skilled in building robust backend systems using Java, Spring Boot, and RESTful APIs.
Proficient in object-oriented programming (OOP), database integration (MySQL, SQL), and microservices architecture.
Strong problem-solving skills with a passion for writing clean, efficient, and maintainable code.

- ZKBioCVSecurity is a multi-module product designed for comprehensive security management.
- Primarily responsible for the development and maintenance of the Access Service and Person Service modules.
- Utilized Bitbucket, Bamboo, and Linux servers to implement automated CI/CD pipelines for seamless builds and deployments
- This involved implementing new features, making adjustments, and integrating systems as needed.
- the system automatically triggers an alert email when an unauthorized person attempts to access a restricted area.
- Additionally, implemented a one-time use QR code system for visitors, ensuring the code is deleted after scanning to prevent reuse and enhance security.
- Optimized deployment workflows by configuring build plans and branch strategies in CI/CD pipelines, significantly reducing manual effort.
- I am primarily responsible for the **Access Service** and **Person Service** modules.

SKILLS

Programming Languages Core Java
Frameworks Hibernate, Spring Boot
Database Management MySQL, SQL
API Development API Development, RESTful architecture, secure API management, third-party integration, Postman for API testing
Software Development Practices Agile methodologies, JUnit testing, Exception handling, multithreading expertise

EDUCATION

BACHELOR OF ENGINEERING in Bachelor of Engineering, VTU (GPA: 7)
I completed my Bachelor of Engineering from Visvesvaraya Technological University (VTU) at JNNCE, with a focus on computer science subjects that strengthened my technical and problem-solving skills.

EXTRA-CURRICULAR ACTIVITIES

Coding Club Member, JNNCE VTU Aug 2017 - 2021
Led a thriving community of **500+ student developers** in my college. Taught and mentored **100+ students** in **Data Structures** and **Algorithms** in Java
